Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2-9, drawn to specific features of the beamsplitter having a wheel with a planar reference surface passing there through and providing support at respective planar positions for a plurality of dichoric beamsplitters whose respective optical axes are perpendicular to said planar reference surface, classified in class 359, subclass 629.
- II. Claims 10-13, drawn to method for selecting a dichoric beamsplitter comprising the steps of providing in a planar array a plurality of dichoric beamsplitter, placing the planar array in the common optical pathway, rotating the planar array, classified in class 250, subclass 201.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require the particulars of the subcombination as claimed such as the beamsplitter having a wheel with a planar reference surface passing there through and providing support at respective planar positions for a plurality of dichoric beamsplitters whose

respective optical axes are perpendicular to said planar reference surface. The subcombination has separate utility such as the beamsplitter having a wheel with a planar reference surface passing there through and providing support at respective planar positions for a plurality of dichoric beamsplitters whose respective optical axes are perpendicular to said planar reference surface.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Charles L. Gholz on 1/15/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
